RE: Letter of Recommendation for the Cascade Design Group

To Whom It May Concern,

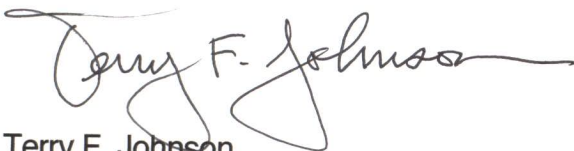

It is my great pleasure to write a letter of recommendation for Pete Bambe and the entire Cascade Design Group.

During our 18 year professional relationship we have worked on more than 100 residential and commercial projects together, including new construction, remodels and additions. The range of building methods have included conventional wood frame, timber frame, log and ICF concrete, as well as hybrid designs.

Throughout these many years and projects we have worked as a team to create designs and solve problems in creative, timely and cost effective ways that respect the requirements and goals of our clients and builders, as well as ourselves.

If there are any questions relative to my knowledge and recommendation of Pete and CDG staff and their work, please feel free to contact me.

Sincerely,

Terry F. Johnson
